

Mehrab Fajar

Industrial Engineering | AI & Digital Transformation
Nantes, France| LinkedIn | GitHub

PROFILE

Industrial Engineering and Computer Science graduate with specialization in AI and Data Science for competitive manufacturing. Experienced in industrial AI, digital solutions, workflow optimization, cross-functional coordination, and analytical problem-solving to address real-world business challenges. Seeking opportunities at the intersection of technology, operations, and digital transformation.

EDUCATION

EIT Manufacturing Master School — M.Sc. in Data Science & AI for Competitive Manufacturing – France/Italy *Sep 2024 – Oct 2026*

- **École Centrale de Nantes** — M.Sc. in Industrial Engineering, Smart & Connected Enterprise.
- **Università degli Studi di Trento** — M.Sc. in Computer Science, ICT Innovation.

University of Education — B.Sc. in Information Technology – Multan, Pakistan *Oct 2018 – Aug 2022*
Foundation in information technology, AI, software development, project management, enterprise systems, and quality assurance.

PROFESSIONAL EXPERIENCE

BLM Group — Industrial AI & Computer Vision Intern — Levico Terme, Italy *Mar 2026 – Aug 2026*

- Built a Python- and YOLO-based computer vision application to automate real-time human-presence monitoring and safety.
- Integrated multi-camera video streams and event detection across 3 laser cutting machines to improve operational visibility.
- Implemented operational analytics and human-in-the-loop validation to improve event verification and process efficiency.
- Achieved a 97.04% F1-score on 500 annotated frames from 86 videos and a 97.18% approval rate across 3 machines.

GoDesign Technologies — Technical Team Lead — Islamabad, Pakistan *Apr 2023 – Jul 2024*

- Optimised end-to-end web development workflows, reducing project completion time by 20% and increasing delivery capacity.
- Managed 90+ client projects, coordinating execution, monitoring KPIs, and resolving bottlenecks to improve delivery efficiency.
- Led a cross-functional team of 7, overseeing task allocation, stakeholder alignment, and project delivery.

GoDesign Technologies — Project Manager — Islamabad, Pakistan *Nov 2021 – Feb 2022*

- Managed 20+ IT project life cycles using Agile and Waterfall methodologies, achieving a 98% on-time delivery rate.
- Coordinated technical teams and clients to align requirements, project timelines, and deliverables.
- Monitored project KPIs and streamlined workflows using Trello, improving operational efficiency by 30%.

Fiverr — Freelance Web Developer — Multan, Pakistan *Nov 2020 – Sep 2024*

- Delivered 400+ business/e-commerce websites for international clients, maintaining a 5-star rating and 98% client satisfaction.
- Managed concurrent projects using Jira, from requirements analysis to deployment, ensuring timely delivery and quality.
- Strengthened client retention through effective communication and reliable delivery, achieving 33% repeat-business rate.

SELECTED PROJECTS

Industrial AI Challenge — Fedrigoni (Arco Plant) — Analyzed industrial slitting processes to support predictive planning and workflow optimization using BPMN, VSM, Python, and Pandas. Case Study
MachineAware AI — Industrial Decision Support — Developed a context-aware AI prototype integrating machine data, technical documentation, and historical incidents for troubleshooting using RAG and Python. Case Study
FaultTrace — Explainable Fault Diagnosis — Built a diagnostic prototype combining HMI alarms, PLC logic, and machine signals for root-cause analysis using Python and temporal reasoning. Case Study

KEY SKILLS

Industrial Engineering & Operations: Operations Research, Process Optimization, Process Mapping, Process Simulation, Lean Manufacturing, 5S, Value Stream Mapping, Six Sigma, 5 Whys, RCA, KPI Monitoring, Continuous Improvement, Kanban.
AI, Data & Technology: Industrial AI, Computer Vision, Machine Learning, RAG, LLMs, Data Analysis & Visualization, Python, SQL, Power BI, Advanced Excel/VBA, Flask, REST APIs, Matplotlib, Git/GitHub, MS Project, Microsoft Office, Trello, Jira.
Soft Skills: Adaptability, Ownership, Proactivity, Effective Communication, Teamwork, Cross-functional Collaboration, Project Management.
LANGUAGES: English (C2) | French (A2) | Italian (A1) | Urdu (Native)

CERTIFICATIONS

AI Literacy (IBM), Machine Learning Foundations (Coursera), Crash Course on Python (Coursera), MATLAB Onramp (MathWorks), Object-Oriented Programming Onramp (MathWorks), Six Sigma Yellow Belt Professional, Innovation and Entrepreneurship (EIT), Career Essentials in Project Management (Microsoft/LinkedIn), Create – Protect – Innovate: Bringing Ideas to Market (European Patent Office).
